Role

This is a fantastic opportunity for a proactive Software Developer to gain practical experience within this highly successful host company who provide unique digital business solutions. Mentored throughout by experienced developers, you will not only be using your existing skills but have every opportunity to learn new software and processes, making this a great addition to your CV and a real boost to your career prospects.

Tasks

- Be part of the team's agile working practices to deliver high quality software solutions

- Follow the technical standards and shared team commitments

- Help build new products and features for the Business Process management (BPM), Open Source Community project

- Write well designed and clean code, proactively identifying and eliminating technical debt

- Contribute technical and product ideas to the team and Product Owner/Product Manager

- Question choices in a constructive and respectable manner

Desired Skills

- Experience working with Java or other programming languages

- Familiarity with the Spring framework will be useful

- Experience with Git and Maven desirable but not required

- Ability to quickly pick up new technologies

- Openness to learn new things

The Host Company

This highly successful host company specializes in providing Digital Business platforms to organisations throughout the world. They connect people, content and processes, enabling seamless efficiency, decision making and productivity. This cloud based product has experienced explosive growth and the company are now doubling their investment to take the business to the next level. There are plenty of opportunities to impress and be part of their success story.
